

**CITY of  
SPRINGFIELD**

May 1, 1991

Mr. Lloyd Eckley  
dba Marine Sales and Service  
639 West Walnut  
Springfield, Missouri 65806

Dear Mr. Eckley:

This letter will confirm our conversation at Marine Sales on April 29, 1991, concerning the discharge of water from a boat motor test stand. The motor test stand appears to be an oval stock tank with hoses and water lines allowing for the operation of power units. At the time of the inspection the test stand was located west of the northwest corner of your building, with overflow crossing the sidewalk and following the curb and gutter of Grant Street north.

The requirements imposed by the Environmental Protection Agency on the City of Springfield now mandate that many such discharges of polluted water to natural waterways may be required to obtain a discharge permit from the State of Missouri Department of Natural Resources. A permit for a discharge such as yours would could be difficult to receive since a sanitary sewer is available to your facility.

While this office does not fully understand your operation, there may be several alternatives to your current practice. If there is a floor drain inside your building, locating the test stand where the discharge is tributary to the floor drain may correct the situation. Also, it may be possible to pump excess water to a floor drain or other sanitary fixture in the building.

If you have any questions please feel free to call 864-1924.

Yours truly,

Stephen Short  
Water Pollution Control Inspector
